

Signhify Hunter — Document Index

Autonomous Client Acquisition OS — find clients across the internet, qualify them with AI, and acquire them with compliant, personalized cold outreach.

#	Document	Purpose
01	01_PRD.md	Product Requirements — what Hunter is, goals, modules, KPIs, compliance
02	02_TRD.md	Technical Requirements — architecture, stack, API, data model, agents
03	03_IMPLEMENTATION_PLAN.md	Build plan M0–M7, week-by-week, acceptance criteria, risks
04	04_FRONTEND_PRD_TRD.md	Frontend spec — routes, components, design tokens, flows
05	05_BACKEND_PRD_TRD.md	Backend spec — API, queues, delivery engine, compliance, observability
06	06_ROADMAP.md	Roadmap — MVP → productized SaaS (Q4) → autonomous account engine (2027)
07	07_GOD_LEVEL_AGENT_PROMPT.md	God-level self-building prompt — paste into any AI build tool
08	08_THEME_ANALYSIS_AND_CREDITS.md	Theme analysis of signhify.dpdns.org + signhify-ai-web + portfolio credits

Quickstart

1. Read 07_GOD_LEVEL_AGENT_PROMPT.md → paste into your AI tool as the master build instruction.
2. Agent reads 01 – 06 as canonical specs and builds M0 → M7 in order.
3. Founders/operators read 01 (what it is) and 06 (where it's going).
